

BARRIER WALL DELINEATORS MGS 06-02C

1.0 DESCRIPTION. This specification covers barrier wall delineators.

2.0 MATERIALS.

2.1 Delineator body, dimensions, and reflective sheeting shall comply with Standard Plans section 903 subsection 903.03BR. All yellow sheeting used to produce delineators must be fluorescent and comply with ASTM D4956 Type XI requirements.

3.0 ORDERING INFORMATION

3.1 The quantity and color of delineators is to be as shown in the order.

4.0 CERTIFICATION

4.1 The bidder must supply sample delineators and certifications during the bidding process. Material certification sheets indicating the manufacturer, color and series number of the reflective sheeting are required prior to award. One of each delineator color combination listed on the bid request must be submitted for review. Furnished samples must fully comply with the requirements of the specification prior to award. Failure to provide any of the requested information will remove the supplier from the bid process.

5.0 ACCEPTANCE.

5.1 Acceptance will be based on acceptable certifications and results of tests performed on the samples taken by the department at destination. The department may sample and test delineators at any time.

6.0 REJECTION.

6.1 If tests performed by the department indicate non-compliance with the requirements of this specification, the entire shipment will be rejected.
