

## Joint Pusher

### Description

This innovation was fabricated to be attached to the front of a skid steer.

### Benefit

During the summer, closed expansion joints can be difficult to remove requiring several employees and multiple pieces of equipment. The joint pusher gets the job done safely in half the time with only one piece of equipment.

### Parts and Labor

See shop drawings on page 2 for complete parts list.

**Total: \$375**

**Labor: 25 hours**

### For More Information
