

## **Appendix B – Alternatives**

This appendix presents the alternatives carried forward for further study, as described in Chapter 2. Depending on the length and breadth of each alternative, in some cases several map sheets were required to show the alternative at a scale sufficient to view the potential impacts of each. Each alternative has a small “key” map that shows the location of that sheet relative to the others in the alternative.

In addition to the physical improvements that make up each of the alternatives, the exhibits on the following pages also show the Land Acquisition and Residential and Commercial Displacements associated with each of the alternatives. The table on the following page presents a summary of all of the Commercial Displacements that are anticipated to be required with one or more of the alternatives. The “Structure ID” number associated with each Commercial Displacement is listed on the table and shown on each exhibit next to the symbol for the structure that would be displaced.
