

Appendix D – I-70 Memorandum of Understanding

MEMORANDUM OF UNDERSTANDING Missouri Interstate 70

WHEREAS, the Federal Highway Administration (FHWA) and the Missouri Department of Transportation (MoDOT) have completed the Interstate 70 First Tier Environmental Impact Statement (EIS), and are now preparing the Second Tier environmental studies for seven sections of independent utility on I-70, with the ultimate goal of widening the existing interstate across much of Missouri; and

WHEREAS, the FHWA and MoDOT have begun consultation with the Missouri Department of Natural Resources State Historic Preservation Office (MOSHPO), as required by Section 106 of the National Historic Preservation Act and 36 CFR 800, the implementing regulations of the Advisory Council on Historic Preservation (ACHP); and

WHEREAS, the interstate was completed in August, 1965, and so is not yet 50 years of age, and determining its eligibility for the National Register of Historic Places presents a challenge in terms of assessment of integrity, as the interstate has continued to evolve over time through reconstruction, maintenance and improvements; and

WHEREAS, the National Register eligibility of the national interstate system is currently being studied by a national task force including representatives of the National Conference of State Historic Preservation Officers, the Federal Highway Administration, the Advisory Council on Historic Preservation and other interested parties;

NOW THEREFORE, the FHWA, MoDOT and the MOSHPO agree to the following:

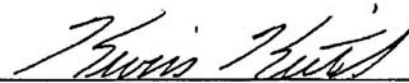

1. A formal assessment of the eligibility of the section of Interstate 70 addressed in the First Tier EIS and in the Second Tier environmental documents will be prepared by the Federal Highway Administration at such time that the interstate has reached 50 years of age, or the national task force has reached an opinion regarding eligibility of the interstate system.

2. In the interim, the FHWA and MoDOT will proceed in good faith to gather documentation on the history and development of this important interstate highway (Interstate 70) in Missouri.
3. Should Interstate 70 or any part thereof be determined eligible at a later date, the FHWA and MoDOT shall enter into consultation with the MOSHPO and the ACHP pursuant to 36 CFR 800.

Appendix F – Traffic Accident and Safety Data

The National Environmental Policy Act (NEPA), 42 U.S.C. §§ 4321-4370f, requires that this analysis of the proposed project must consider and discuss its effects and impacts on mankind, and its effects and impacts on plants, animals, resources, and the natural world in general. One of the key elements to be discussed in any NEPA analysis of a proposed highway project is its effects and impacts on the safety of those who use those highways. However, Congress has recognized that even while this document summarizes and presents traffic accident and safety information for the general information and benefit of the public, pursuant to federal law, some people may attempt to use the information to establish federal, state or local liability in lawsuits arising from highway accidents. Congress has enacted a law, 23 USC Section 409, which prohibits the discovery or use of highway accident and safety data, developed under federal law to make highway safety improvements, in litigation seeking damages for accidents and occurrences on these highways. Congress's rationale is obvious: the safety data was compiled and collected at their request, to help prevent future accidents, injuries and death on our nation's highways. If that information can be used in expensive damage suits, then the millions of dollars that litigation may cost the Missouri Department of Transportation (MoDOT) and local governments will not be available for their use to make Missouri's highways safer.

Traffic accident statistics and safety data are compiled, presented, and summarized in portions of this NEPA document. Where noted in an introductory footnote to a section of this document, the discussion, reports, lists, tables, diagrams and data presented throughout that chapter, unit, section or subsection was compiled or collected for the purpose of identifying, evaluating or planning the safety enhancement of potential accident sites or hazardous roadway conditions pursuant to federal law. Thus, that information and its supporting reports, schedules, lists, tables, diagrams and data are not subject to discovery, and they are prohibited by federal law (23 USC § 409) from being admitted into evidence in a federal or state court proceeding, or from being considered for other purposes, in any action for damages arising from an occurrence on the highways, intersections or interchanges discussed in this document.
