

## Fixed Spinner

### Description and Benefit

The Fixed Spinner is a shorter spinner shoot for tow plow truck to distribute material evenly on the road when pulling the tow plow instead of dropping material in the middle of the road and wasting time and material when removing snow or ice off the road. This innovation saves time and money by distributing material evenly across the driving lanes of the road. Safety is also improved by helping us complete our jobs efficiently to clear roads so the public can travel safely.
