

I-70 Environmental Process

- Follows National Environmental Policy Act (NEPA)
- Divided the 200 miles of I-70 into 7 sections, called sections of independent utility (SIU)
- Engineering consultants are re-evaluating I-70 to determine whether previous decisions from the mid 2000s' studies remain valid. These updates include reviewing traffic volumes and patterns, land use, and conditions.
- These re-evaluations should be completed by late Summer 2024
