**Missouri Statewide Airports
Economic Impact Study**

- Missouri is served by **nine** commercial service airports in the state and **99** publicly owned, public use general aviation airports.
- Missouri's commercial service airports enplaned nearly **12 million** passengers in 2012.
- Missouri supported approximately **264,000** general aviation visitors at airports in 2012.
- Airports in Missouri support more than **420** on-airport aviation related businesses.
- More than **\$130 million** was invested in the state's airports in 2012 through updates and renovations.
- Missouri airports support **11** scheduled commercial airlines throughout the state.
- More than **195,000** tons of cargo are transported by air in Missouri each year.

Prepared by: Landrum & Brown, Incorporated | 2013

Economic Impact Study

Missouri's airport system is not only a means of safe and efficient transportation, but also provides over 100,000 jobs and accounts for more than \$11 billion in total economic activity. Each of the airports in Missouri has a specific impact on its local community that goes far beyond the local level to serve as a catalyst for economic growth.

STUDY PROCESS

Similar to the 2002 Missouri economic analysis, the economic impact generated by Missouri's airports is quantified in terms of direct, indirect, and induced economic activity and spending.

Direct impacts are based on the employment, wages, and sales generated by on-airport business activity. Common direct impacts stem from tenants like fixed-base operators (FBOs) or aircraft maintenance operations.

Indirect impacts arise from visitors arriving by aircraft and their spending on food, hotels, entertainment, transportation, and other activities. These expenditures support additional jobs, wages, and output.

Induced impacts, also referred to as multiplier impacts, are created through the "spin-off" effect of users purchasing goods and services from other local businesses and through workers spending wages and other income for household goods and services. For example, when an airport employee is paid, he or she uses their salary to purchase local goods and services at businesses in the area, which in turn spend their revenue locally, thus generating additional economic activity in the region.

Combined, the direct, indirect and induced impacts determine the total economic impacts for each airport and the statewide airport system.

IMPACT MEASURES

Jobs represent the number of people who are employed and are presented as full-time equivalent jobs.

Payroll represents the total annual wages, salaries, and benefits paid to all workers.

Output measures the value of goods, services and capital expenditures.

TOTAL JOBS
100,621

TOTAL PAYROLL
\$3,128,646,000

TOTAL OUTPUT
\$11,101,699,000

TOTAL PAYROLL
\$209,000

TOTAL OUTPUT
\$1,898,000

BENEFITS OF THE AIRPORT

Clinton Memorial Airport is located 85 miles southeast of Kansas City. The airport is owned and operated by the City of Clinton. The airport has two runways, newly constructed Runway 18/36 which is 5,000 feet long and a crosswind runway, Runway 4/22 which is 4,001 feet long. Through a commitment to serve and attract general aviation users, the airport contributes to meeting the needs of individuals, the general public, the armed forces, and the business community it serves.

Common activities at the airport consist of corporate business activity, aerial agricultural spraying, recreational flying, and flight training. The airport provides a gateway to outdoor enthusiasts visiting Truman Lake. Seasonal activities include aerial photography and inspections and military exercises by nearby Missouri National Guard units. The airport further enhances the quality of life in the area by supporting police/law enforcement activity, environmental patrols, medical doctor transports, and forest firefighting. In addition, the Missouri Department of Conservation utilizes the airport as needed for search and rescue missions. The airport promotes community outreach by seasonally providing Experimental Aircraft Association (EAA) Young Eagle events, which offer introductory flights to youth of all ages.

The airport serves as the FBO providing fuel, both 100LL and Jet A, and hangar and tie-down rentals. Bedini Aviation Maintenance is a full time maintenance operator located on the airfield. Avfab, Golden Valley Aviation, Healthcare Executive Leadership Partners LLC, Par Electrical Contractors Inc., and Bass Pro/Tracker Boats are companies who frequently use the airport to transport staff, equipment, and goods in and out of the region.
