**Missouri Statewide Airports  
Economic Impact Study**

- Missouri is served by **nine** commercial service airports in the state and **99** publicly owned, public use general aviation airports.
- Missouri's commercial service airports enplaned nearly **12 million** passengers in 2012.
- Missouri supported approximately **264,000** general aviation visitors at airports in 2012.
- Airports in Missouri support more than **420** on-airport aviation related businesses.
- More than **\$130 million** was invested in the state's airports in 2012 through updates and renovations.
- Missouri airports support **11** scheduled commercial airlines throughout the state.
- More than **195,000** tons of cargo are transported by air in Missouri each year.

Prepared by: Landrum & Brown, Incorporated | 2013

Statewide Economic Impacts

## Economic Impact Study

Missouri's airport system is not only a means of safe and efficient transportation, but also provides over 100,000 jobs and accounts for more than \$11 billion in total economic activity. Each of the airports in Missouri has a specific impact on its local community that goes far beyond the local level to serve as a catalyst for economic growth.

### STUDY PROCESS

Similar to the 2002 Missouri economic analysis, the economic impact generated by Missouri's airports is quantified in terms of direct, indirect, and induced economic activity and spending.

**Direct** impacts are based on the employment, wages, and sales generated by on-airport business activity. Common direct impacts stem from tenants like fixed-base operators (FBOs) or aircraft maintenance operations.

**Indirect** impacts arise from visitors arriving by aircraft and their spending on food, hotels, entertainment, transportation, and other activities. These expenditures support additional jobs, wages, and output.

**Induced** impacts, also referred to as multiplier impacts, are created through the "spin-off" effect of users purchasing goods and services from other local businesses and through workers spending wages and other income for household goods and services. For example, when an airport employee is paid, he or she uses their salary to purchase local goods and services at businesses in the area, which in turn spend their revenue locally, thus generating additional economic activity in the region.

Combined, the direct, indirect and induced impacts determine the total economic impacts for each airport and the statewide airport system.

### IMPACT MEASURES

**Jobs** represent the number of people who are employed and are presented as full-time equivalent jobs.

**Payroll** represents the total annual wages, salaries, and benefits paid to all workers.

**Output** measures the value of goods, services and capital expenditures.

TOTAL JOBS	<b>100,621</b>
TOTAL PAYROLL	<b>\$3,128,646,000</b>
TOTAL OUTPUT	<b>\$11,101,699,000</b>

## Eldon Model Airpark

TOTAL JOBS  
**16**

TOTAL PAYROLL  
**\$365,000**

TOTAL OUTPUT  
**\$1,842,000**

### BENEFITS OF THE AIRPORT

Eldon Model Airpark is located north of Lake of the Ozarks within the City of Eldon. The airport is owned and operated by the City of Eldon. The airport has one concrete paved runway, Runway 18/36 which is 4,000 feet long. Through a commitment to serve and attract general aviation users, the airport contributes to meeting the needs of individuals, the general public, the armed forces, and the business community it serves.

Common activities at the airport include corporate flying, resort visitors flying into the airport, and recreational flying. The airport also serves as a gateway to outdoor enthusiasts visiting central Missouri's popular rivers, lakes, and resorts near Lake of the Ozarks. Students, faculty, staff, and visitors of Columbia College Missouri at Lake of the Ozarks frequently utilize the airport. Seasonally, the airport supports aerial agricultural spraying, aerial inspections, and aerial photography. The airport enhances the quality of life in the area by supporting emergency medical evacuation flights which transport critically ill or injured patients throughout the region.

The airport provides FBO services that include fuel and hangar and tie-down rentals. Aircraft Systems is based at the airport and offers airport users aircraft maintenance and repair services. ACP Enterprises, Ambassador Cartage, Dairyland Power Cooperative, Dynamic Industrial Supply, Primary Insights, Johnson Controls, and SR Real Estate are companies who rely on the airport to transport staff, equipment, and goods in and out of the region.
