LPA Question Database

A screenshot of a web form titled "LPA Question Database". The form is set against a background with a repeating MoDOT logo. It contains two sections: "1. Select your location: *" with radio button options for Central Office, Northwest District, Northeast District, Kansas City District, Central District, Saint Louis District, Southwest District, and Southeast District; and "2. Select Program Type (Check all that apply): *" with checkbox options for BEAP, BRO/BFP, and COST SHARE.

Description and Benefit

The LPA Question Database is a sharepoint-based question response site that allows District LPA personnel to submit questions directly to Central Office Design Staff with automatic notification and storage of submissions and responses. This allows for rapid feedback and guidance to be provided and at times removes the need to even ask a question, as the question may already be in the database. A simple Microsoft form is filled out by the District and a response provided by the CO Design group is recorded with the question in a sortable list format.
