Subject: Bridge Advertisement (No DSI): Bridge Special Provisions 11/13/24
Date: Thursday, November 21, 2024 9:03:51 AM

The [Bridge Special Provisions](#) have been updated as described below:

Implementation Statement:

(The Implementation Statement is a recommendation by the Development Section. The SPM is responsible for the level of implementation for any particular job.)

Revision Date	Items Revised	Description of Change
Nov. 2024	EPG: NA	<p><u>104-BSP-01 Construction Requirements:</u> The table in section 3.3 was updated to replace Calcium Sulfonate Overcoat with System G Overcoat. Calcium sulfonate is no longer an acceptable option for overcoating. Also, minor revisions were made to the guidance at the top of the BSP.</p> <p><u>702-BSP-02 Dynamic Pile Testing:</u> Section 2.1.1 was rewritten to match the language of the recent change to the Pile Wave Analysis BSP.</p> <p><u>704-BSP-08 Concrete Crack Filler:</u> The option to shot blast the deck in addition to water blast to clean out cracks was added to section 3.2.3. Some vendors prefer to shot blast. Also, verbiage was added to section 3.3 to not allow crack filler material to run into drains. This matches spec book language for epoxy polymer overlays.</p> <p><u>712-BSP-09 Strengthening Existing Beams:</u> Section 3.5 was updated to replace Calcium Sulfonate Overcoat option with System G Overcoat option. Also, revisions were made to the guidance at the top of the BSP for the different paint options.</p> <p><u>712-BSP-14 Structural Steel Protective Coating Requirements:</u> Several sections were updated to match the standard notes for structural steel protective coatings. All references to Calcium Sulfonate Overcoat were replaced with System G Overcoat since calcium sulfonate is no longer an acceptable option for overcoating. References to inorganic zinc</p>
	Bridge Standard Drawings: NA	
	MicroStation Cells: NA	
	Std. Specifications: NA	
	Standard Plans: NA	
	Bridge Special Provisions: 104, 702, 704, 712, 627	

		<p>primer were replaced with organic zinc primer since the current practice for recoating existing steel is to use organic primer. Revisions were also made to the guidance at the top of the BSP.</p> <p><u>627-BSP-01_Deflection and Haunching:</u> This BSP was not updated, but a link was added to access the spreadsheet “Redeck Dead Load Deflections Example”.</p>
