

ASSET Management

MoDOT has adopted an asset management approach to make the best decisions with transportation investments. The goal of the plan is to keep roads and bridges in good condition for as long as possible given current funding levels. The plan also demonstrates the investment level needed in order to maintain the system at its current condition.

Asset	Asset Management Goal Based on Current Funding
Interstates and Major Routes	90% Good Condition
Minor Routes	80% Good Condition
Low Volume Routes	70% Good Condition
Bridges	Less Than 900 Poor Condition

The asset management 10-year funding needs are shown in the chart below:
